

# Special Update 4

## **Remediation**

We would like to keep you up to date regarding remediation of the Rec Center and our efforts to reopen for member use:

- We are continuing remediation of the pools - circulation of the water along with cleaning of the filters. We will drain and fill the pools before reopening and will replace the filter cartridges with new ones. We recently had the opportunity to have Purdue University, in partnership with UCLA, up at SYRC to take samples of the pool water to be tested for any remaining harmful contaminants. We have yet to receive the results, but this will give us a detailed look at the effectiveness of our remediation efforts, especially when it comes to the almost microscopic insoluble solids from ash thrown around by the fire.
- Our insurance is in contact with Rainbow International (chosen at our 3/27 board meeting) for remediation services for the Rec Center buildings and grounds. The reports are currently being reviewed and compared by our adjuster. Once they, and we, are in agreement, remediation will be scheduled, which will provide a clearer image of the timeline to reopen.
- Penalties for not paying dues will continue to be waived through April (although our hope is to reopen during). If you do not wish to pay dues for April, you must keep your automatic payment disabled in your AppFolio portal. Please remember these dues may be required at a later time. You may also pay dues as normal.

A reopening date will be announced as soon as we have a clear image of the timeline for the remaining remediation.

If you have any questions, please direct **all** communication to [syrkdir@gmail.com](mailto:syrkdir@gmail.com) and [nhofmann@lbpm.com](mailto:nhofmann@lbpm.com).
